Hickory, NC 28601

This letter is a follow up to our site visit to the property located beside 142 Lydia LN in Statesville. Duke Energy will allow you to install your sewer drain field under our existing distribution high voltage line located at the front of this property. We would ask that you stay back a minimum of 30' from any of our existing poles. If you have any further questions, give me a call at 828-323-2733.
