RE: Approval No. WWM1459
Abandon Well without Removal of Debris
175 Washam Rd.
Mooresville, NC 28117

On September 8, 2022, the On-site Water Protection Section received your request to approve the abandonment of a water supply well that currently has filled with cuttings inside the casing, and removal of the casing and this material is not an option. The approval request is for the abandonment of one (1) water supply well at 175 Washam Rd., Mooresville, NC. In your request you indicated that due to the depth of the material and uncertainties' surrounding the ability to remove the cuttings in the well, properly abandoning this well per 2C. 0100 regulations is not a viable option.

Based upon available information provided by the Iredell County Environmental Health Department you are approved to abandon the well without removing any material by pumping and/or pouring grout into the portion of the well containing the cuttings to land surface, in conformity with the requirements of 15A NCAC 02C .0113. A copy of this approval should be attached to the required Well Abandonment Record (GW-30) as well as the county well permit at such time that it is issued.

The approval of this variance does not affect any of the other requirements or limitations of the Well Construction Standards, including but not limited to the requirements in 15A NCAC 2C .0113(b) to repair or to abandon any well which acts as a source or channel for the migration of contamination or to your responsibility to comply with any other applicable Federal, State, or local laws or regulations. Furthermore, the granting of this approval is for the well location only, and in no way relieves the owner or agent from other requirements of the North Carolina Well Construction Standards, or any other applicable law, rule, or regulation that may be regulated by other agencies, nor does it imply sufficient water quality.

If you have any questions regarding this variance, please contact Wilson Mize at (919) -270-9665

Sincerely,

Wilson Mize

D. **REASON FOR VARIANCE REQUEST** – Include type of well(s) to be constructed; rule for which the variance is being requested; description of how the alternate construction will not endanger human health and welfare and the environment; and reason why construction and/or operation in accordance with the standards is not technically feasible and/or provides equal or better protection of the groundwater.

Well could not be completed – casing could not be pulled and well has started to fill with cuttings and soil so it cannot be properly abandoned either.

E. **ATTACHMENTS** – Provide the following information as attachments to this application:

(1) A map showing general location of the property (including road names, NC State Route Number, distances, any key landmarks, etc.) sufficient for finding the well location.
(2) Detailed site map with scale showing location of proposed well relevant to septic system(s), building foundations, property lines, water bodies, potential sources of contamination, other wells, etc.
(3) Submit a copy of the local well permit application and site evaluation map (if applicable).
(4) Any other information relevant to the variance request such as a well construction diagram showing proposed well liner or atypical construction materials/methods.
