Donna M. Campbell, RN, MPH
Health Director

To whom it may concern,

On 4-14-2008, a septic permit for a Low Pressure Pipe system with Drip Irrigation repair was issued for 141 Honeysuckle Ln Mooresville, NC 28117 (CL&T Section 9 Lot 39). The Improvement Permit was issued by Steve Hedrick and the Authorization to Construct was issued by Anthony Cocker, both of Iredell County Environmental Health. I, Ben Aldridge, was contacted by Mike Athanas and a meeting was set up for 6-19-2009. Representatives from Stanley Septic Tank Service, Mike Athanas and I met on the site to go over the layout and the installation procedures. At this time it was discovered that grading of some kind had been done in the edge of the septic area and the system could no longer be installed as designed. 180' of Low Pressure Pipe drain line is required for this system. Originally the layout called for 3 lines totaling 180' but the grading that was done caused a problem and this had to be redrawn. The redraw consists of 5 shorter lines totaling 180' which allows the lines to stay out of the graded area. In turn, because the system had to be redrawn, $850 was owed to Iredell County Environmental Health.
