Design M62846

2,341 Sq. Ft. - Main Level; 1,380 Sq. Ft. - Lower Level; 51,290 Cu. Ft.

● The street view of this Spanish design shows a beautifully designed one-story home, but now take a look at the rear elevation. This home has been designed to be built into a hill so the lower level can be opened to the sun. By so doing, the total livability is almost doubled. A unique feature of the lower level is the summer kitchen.
