Notice: Floorplan, Specifications, Details, and Square Footage Subject to Change Without Notice

This design takes a little of the Southeast and shares it with the rest of the regions. Twin dormers separate two sets of matching gables, and the study's exterior window is accented with a metal roof. Columns are used to define the dining room without enclosing space. While the master bath is crowned by a tray ceiling, the master bedroom and a secondary bedroom feature vaulted ceilings. A convenient pass-thru connects the kitchen to the great room, and the fireplace has built-in shelves on both sides. A sizable utility room is complete with counter space, and the garage includes a storage area. Above the garage, the bonus room awaits expansion needs.

Total Living Area .....2330 sq. ft.

Notice: Above Square Footage Does Not Include Bonus Room
