DEPTH:
47'-0"

TO SUIT THOSE WHO FAVOR VICTORIAN STYLING,

this Gothic Revival home features a dramatic brick exterior that is further emphasized by the varied roofline and the finial atop the uppermost gable. The main level opens with a two-story foyer and formal living and dining rooms. The living room contains a fireplace set in a bay window and is separated from the dining room by a symmetrical column arrangement. The more casual family room is to the rear of the plan. Guests, a bedroom and bath are located on the main level. The second floor provides additional bedrooms and baths for family as well as a magnificent owners suite. This home is designed with a basement foundation.
