

This home, as shown in the photograph, may differ from the actual blueprints. For more detailed information, please check the floor plans carefully.

Southern grandeur is evident in this wonderful two-story design with its magnificent second-floor balcony. The formal living spaces—dining room and living room—flank the impressive foyer with its stunning staircase. The family room resides in the rear, opening to the terrace. The sunny breakfast bay adjoins the island kitchen for efficient planning. The right wing holds the two-car garage, utility room, a secondary staircase and a study that can easily be converted to a guest suite with a private bath. The master suite and Bedrooms 2 and 3 are placed on the second floor.
