Southern Living
Design Collection

This quaint one-story design combines classic architectural detail with a charming cottage feel. Elegant columns grace the front porch to create an inviting entry, while bright windows and a wide center gable offer a memorable first impression.

Inside, the New Albany uses every bit of its 1,920 square feet. A formal living and dining room make ideal gathering spaces for a delightful holiday meal or a private library. The family room is marked by an arched opening flanked by columns for a sense of arrival. With twelve-foot ceilings in the dining room, living room and family room the home offers a lofty feel.

The expansive master suite features a tray ceiling and bright windows. The master bath is complete with his and her vanities, a vaulted ceiling and spacious walk-in closet. An optional basement stair location adds flexibility and room to grow.
