SINDOWN AMENITY DESIGN FLOW

- POOL AREA = 1200 ft²
- 1 SWIMMER / 15 ft²
- RULES = 10 SQM per person

$$\Rightarrow \frac{1200\ ft^2}{15\ ft^2/person} = 80\ persons$$

$$80 \times 10\ SQM = \underline{\underline{800\ SQM}}$$

$$Flow/Lot = \frac{800\ gpd}{96\ lots} = 8.3\ *$$

* This is lower than last several subdivisions we have done.

⇒ Flow only from showers & toilets.
- No clubhouse room for mtgs or parties.
