4. The well shall be located in the area indicated on your map (attached).

5. The well driller shall be certified by the North Carolina Well Contractor Certification Commission as required by General Statutes 87-98.4, Title 15A NCAC 27.0101 and .0110.

6. Notification shall be given to Kevin Bubak at the letterhead address or by phone at 704/663-1699 at least 24 hours prior to the start of well construction.

7. A water sample shall be collected and tested for total and fecal coliform bacteria after the well is completed. The results shall be submitted to the Mooresville Regional Office, Aquifer Protection Section within 30 days of well completion.

It is my finding that the factors specified above are sufficient to satisfy the conditions for approval of a variance as defined in 15A NCAC 2C.0118. A copy of this variance should be attached to the required Well Construction Record (GW-1).

The granting of this variance is for the location of the well only, and in no way relieves the owner or agent from other requirements of the North Carolina Well Construction Standards, or any other applicable law, rule or regulation that may be regulated by other agencies. If you are dissatisfied with this decision, you may commence a contested case by filing a petition under G.S. 150-23 within sixty (60) days after receipt of the decision.

If you have any questions regarding this variance, please contact Kevin Bubak at 704/663-1699.

Sincerely,

Andrew H. Pitner, P.G.
