Attn: David R. Hinson, R.S.
Environmental Health Program Coordinator

Dear Mr. Hinson:

In response to our meeting of Tuesday, July 26th the following observances to insure non hazardous or harmful substances are being installed. The location of the site will be the general practice dental office of Dr. Diane Haberl 747 Brawley School Road, Mooresville, N.C. 28115.

As the dental supplier we are eager to comply with the Environmental Health Program, by supplying the dental industry with the latest in environment sensitive equipment.

Dr. Haberl's office will be equipped with:

(a) Dental units in each operatory equipped with collection strainers to catch any wasted amalgam. These strainers are installed between the suction tube and the suction line.

(b) A Dent-X 810 Basic Automatic Film Processor will be used in conjunction with "Quick Silver" Recovery Unit and "Quick Silver" EPA Compliance Kit.

(c) All other solutions and disinfecting cleaners will be contained in appropriate containers, marked hazardous waste and stored to eventually be picked up by Recovery Corporation of North Carolina, or will be of a bio-degradable formula.

All staff members will be instructed upon completion of installation , of the required operating and maintenance procedures.

Thank you for your cooperation in the speedy response you have shown to this project.

Sincerely,

Aleida Mackey

Dr. Diane Haberl

cc: Mr. John Brown
