N O T I C E !

BUILDING INSPECTOR AND HOMEOWNER. Requirements are listed below which must be met for mobile homes on individual lots in all areas where mobile homes are permitted, before a certificate of occupancy can be issued:

(1) All mobile homes shall be built in conformance with the 1976 National Manufactured Housing Construction and Safety Standards Act and HUD requirements.

(2) All mobile homes shall have continuous brick, cinder block, concrete block, stucco, stone, or other masonry-type material underpinning or other non-aluminum underpinning specifically manufactured for mobile homes, unpierced except for required ventilation and an access door. Such underpinning shall be installed under all elements of the building and also remove or screen tongue from view.
