Septic tail line encroachment
In existing overhead power line
Right-of-way

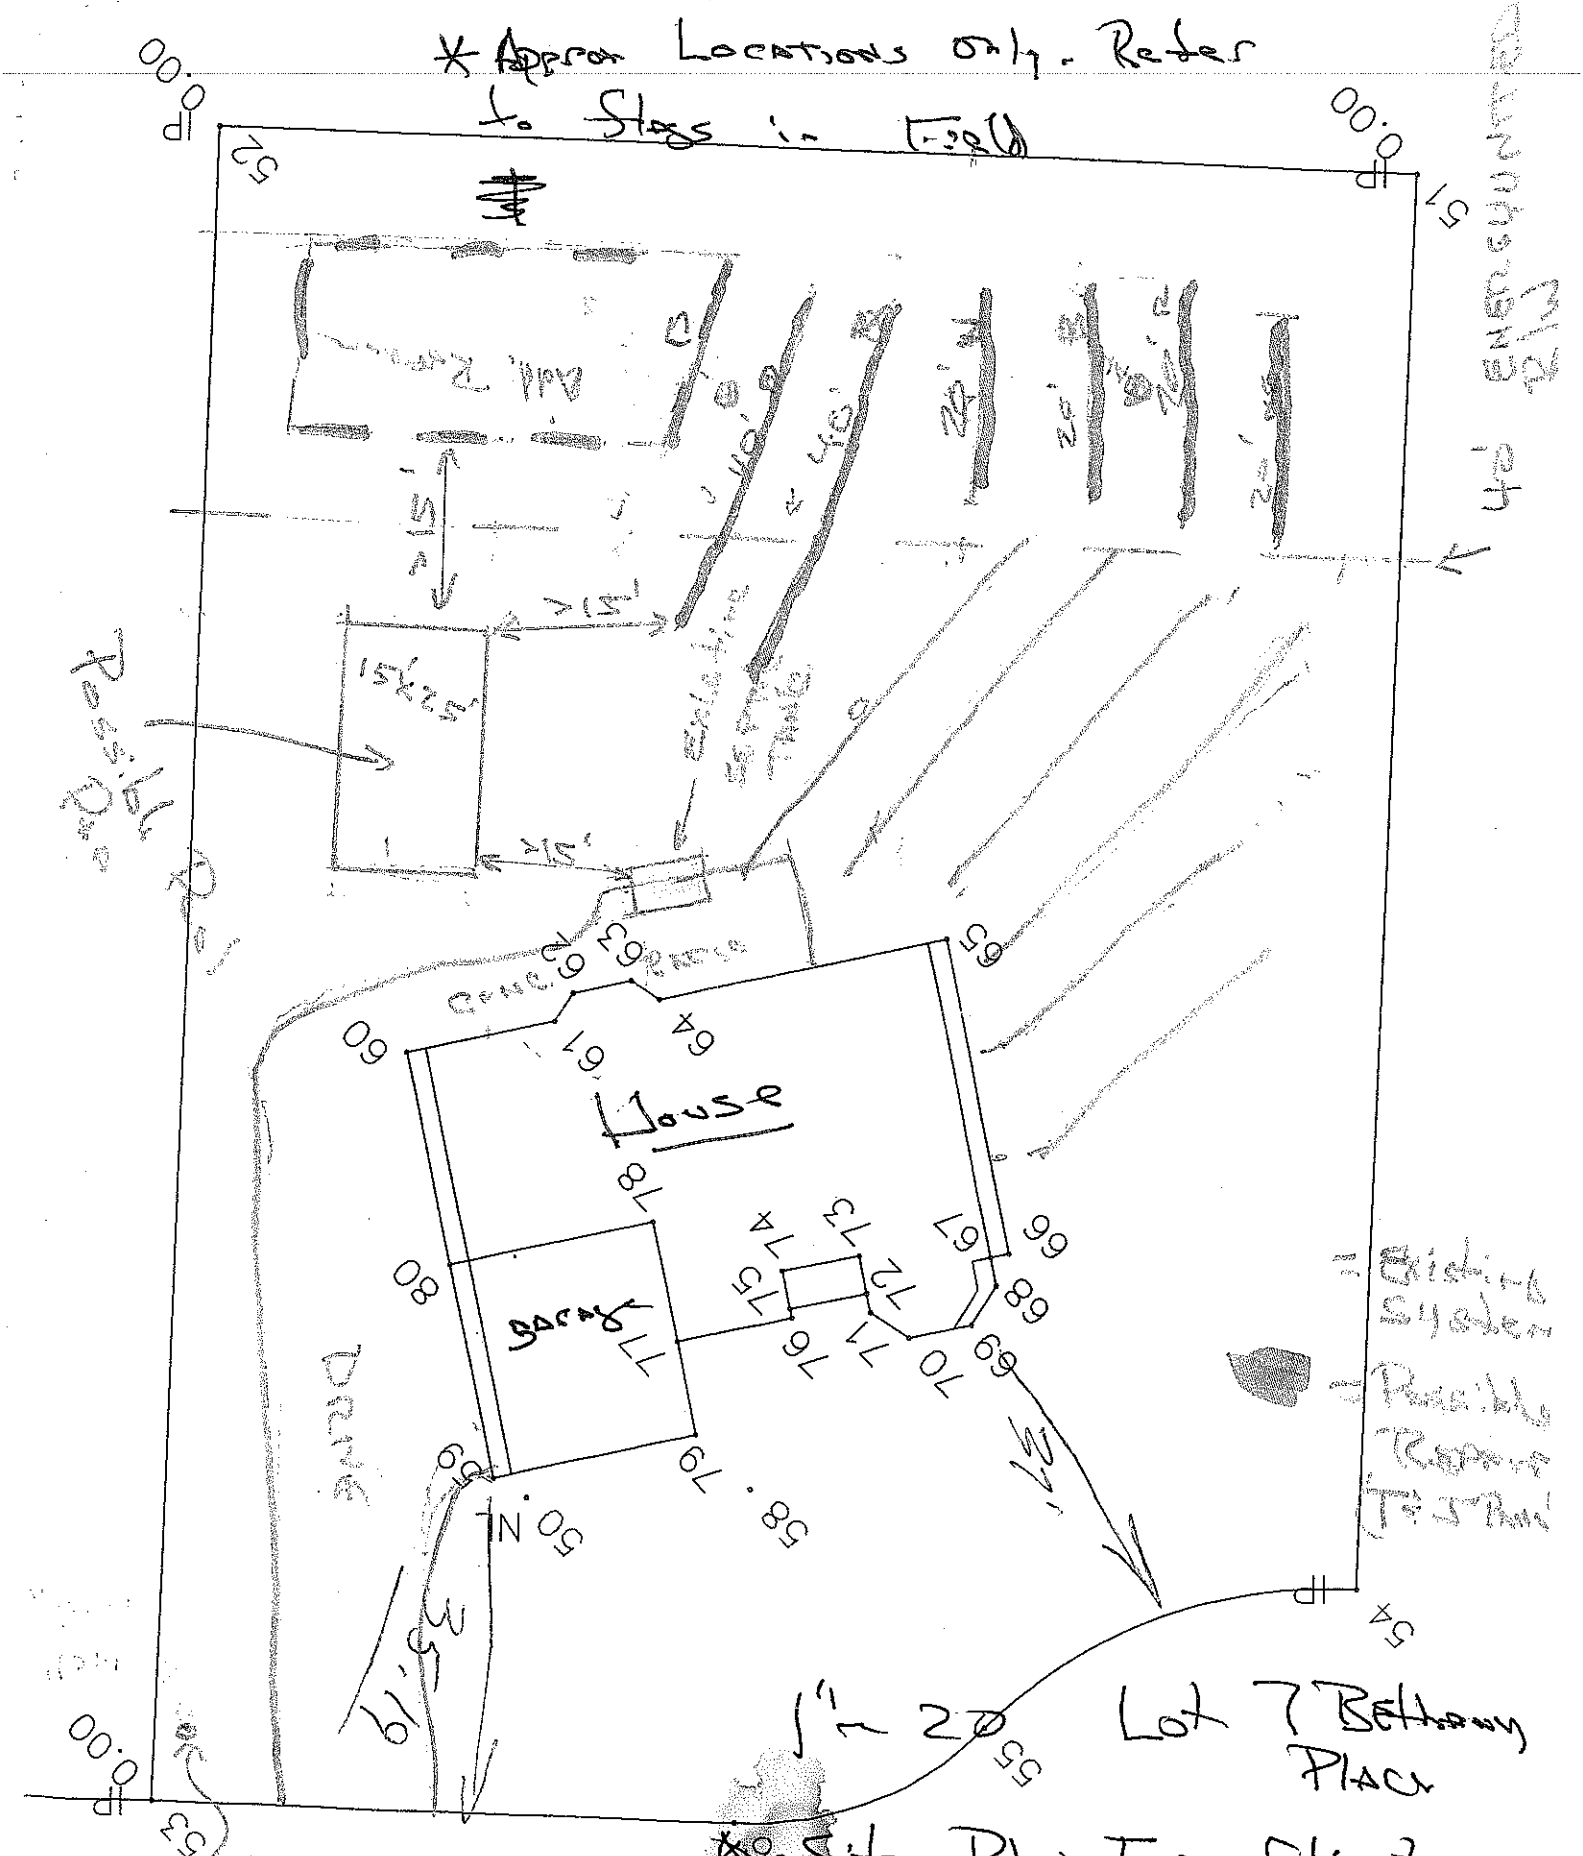

April 21st 2010

Charles Binder
141 Albany Dr.
Lot #1 — to Lot 9
Mooresville, NC, 28115

Ref: Area is located in rear of property that goes under an established power line.
PID: 4669115610

It is standard operating procedure that EnergyUnited will allow the tail lines, and underground connecting conduit of a septic system to encroach in an existing, overhead power line. It is understood that the septic tank is not allowed to encroach in the right-of-way strip, and that the tail lines should be as far from the existing structures as possible. Further, it is understood that EnergyUnited will not be liable for damages to the tail lines at any time for any reason even if the damages are the direct result of actions taken by EnergyUnited.
