Specifications
for
Operator in Responsible Charge
of
Duke Power State Park's Class IVb Subsurface System

The ORC will meet all requirements of the applicable laws and rules of the State of North Carolina for operation of a class IVb subsurface wastewater collection system located at the community building at Duke Power State Park. The affected period of operation is October 1, 2000 through January 31, 2001.

During this period, the ORC will make at least one site visit to occur no earlier than December 1, 2000 for the purpose of a semi-annual inspection. The site visit will consist of but is not limited to the following:

a) Inspect septic tanks for influent/effluent line blockage, tank/riser leakage, general condition of the tanks including sanitary tees, baffles, and filters. Clean filters and notify park staff of required corrective action.

b) Inspect grinder pump station for leaks and solids accumulation. Remove solids as needed and insure pump station is working properly.

c) Determine and record pump delivery rate.

d) Inspect nitrification field for surfacing of wastewater, settled ground, broken pipes and diversion of surface waters.

e) Record water usage and pump counter reading

Duke Power State Park staff will be responsible for the financial responsibilities of all repairs and alterations. Park staff will be responsible for mowing drain fields.
