

Cozy and easy on the family budget, this three-bedroom floor plan greets everyone with a welcoming front porch, stylish gables, and triple windows in the master bedroom and dining room. Cathedral ceilings add distinction to the great room, as well as a second-floor bedroom. A tray ceiling accents the master bedroom, and the master suite is finished with dual closets, double vanities and a garden tub with a picture window. A kitchen island adds functionality and space, creating a free flow through the common areas of the house. For future expansion, the bonus room accesses the second floor. Note the conveniently located powder room.
