An appealing blend of stone, siding and stucco announces a 21st-Century floor plan. A formal dining area defined by decorative columns opens to a grand great room with a centered hearth. The gourmet kitchen overlooks the great room, and enjoys natural light brought in by the bayed breakfast nook. The sleeping wing, to the right of the plan, includes a sumptuous master suite with a tray ceiling and a skylit bath with twin vanities. A secluded study is near a family bedroom and shares its bath.
