LOT 1

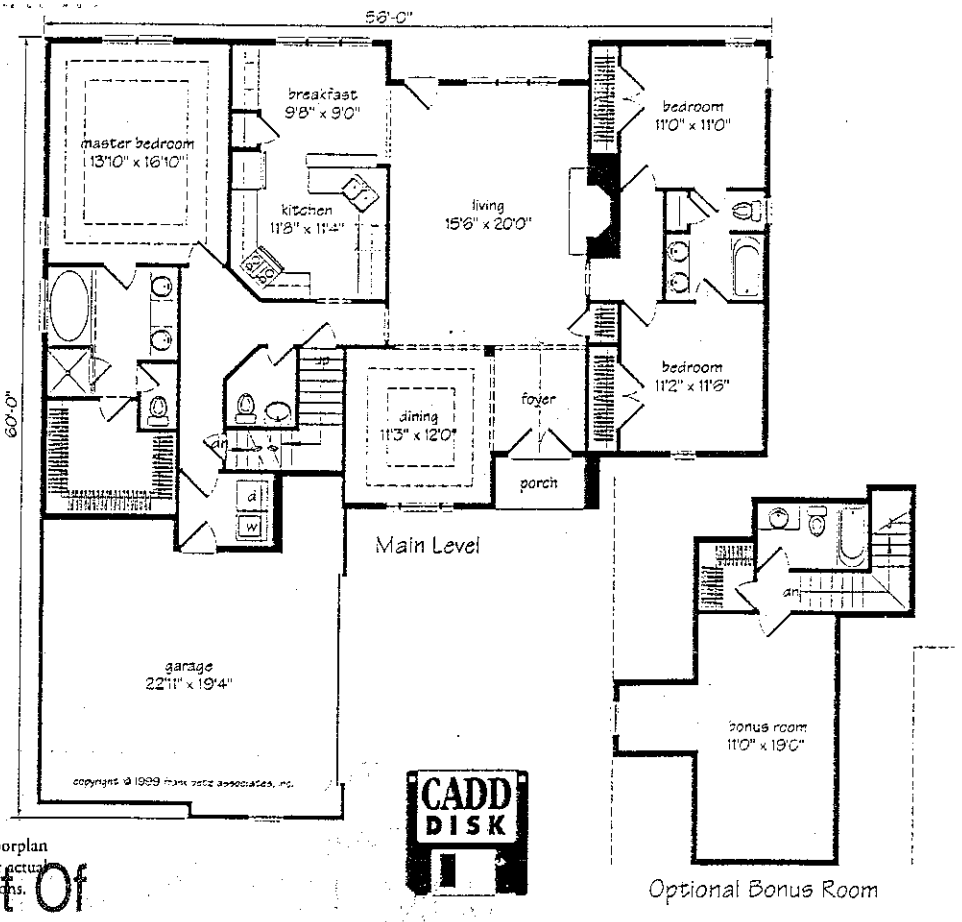

Southern Living
Design Collection

The Langston's stone and cedar exterior creates a quaint French-country feel complete with decorative board and batten shutters. The careful mix of materials gives this design a timeless evolved look, suggesting the home has grown up with the family.

Inside, high ceilings and an open floor plan make this home large and roomy. The family room is graced by a wall of windows, inviting fireplace and vaulted ceiling. Secondary bedrooms are separated from the master suite for a sense of privacy. The master suite features a tray ceiling and expansive bath with his and her vanities, a separate tub and shower and a large walk-in closet.

The Langston also offers a roomy optional bonus room with its own bath and a walk-in closet. The perfect get-away for an at-home office, game room or fourth bedroom.
