3832 SQ FT

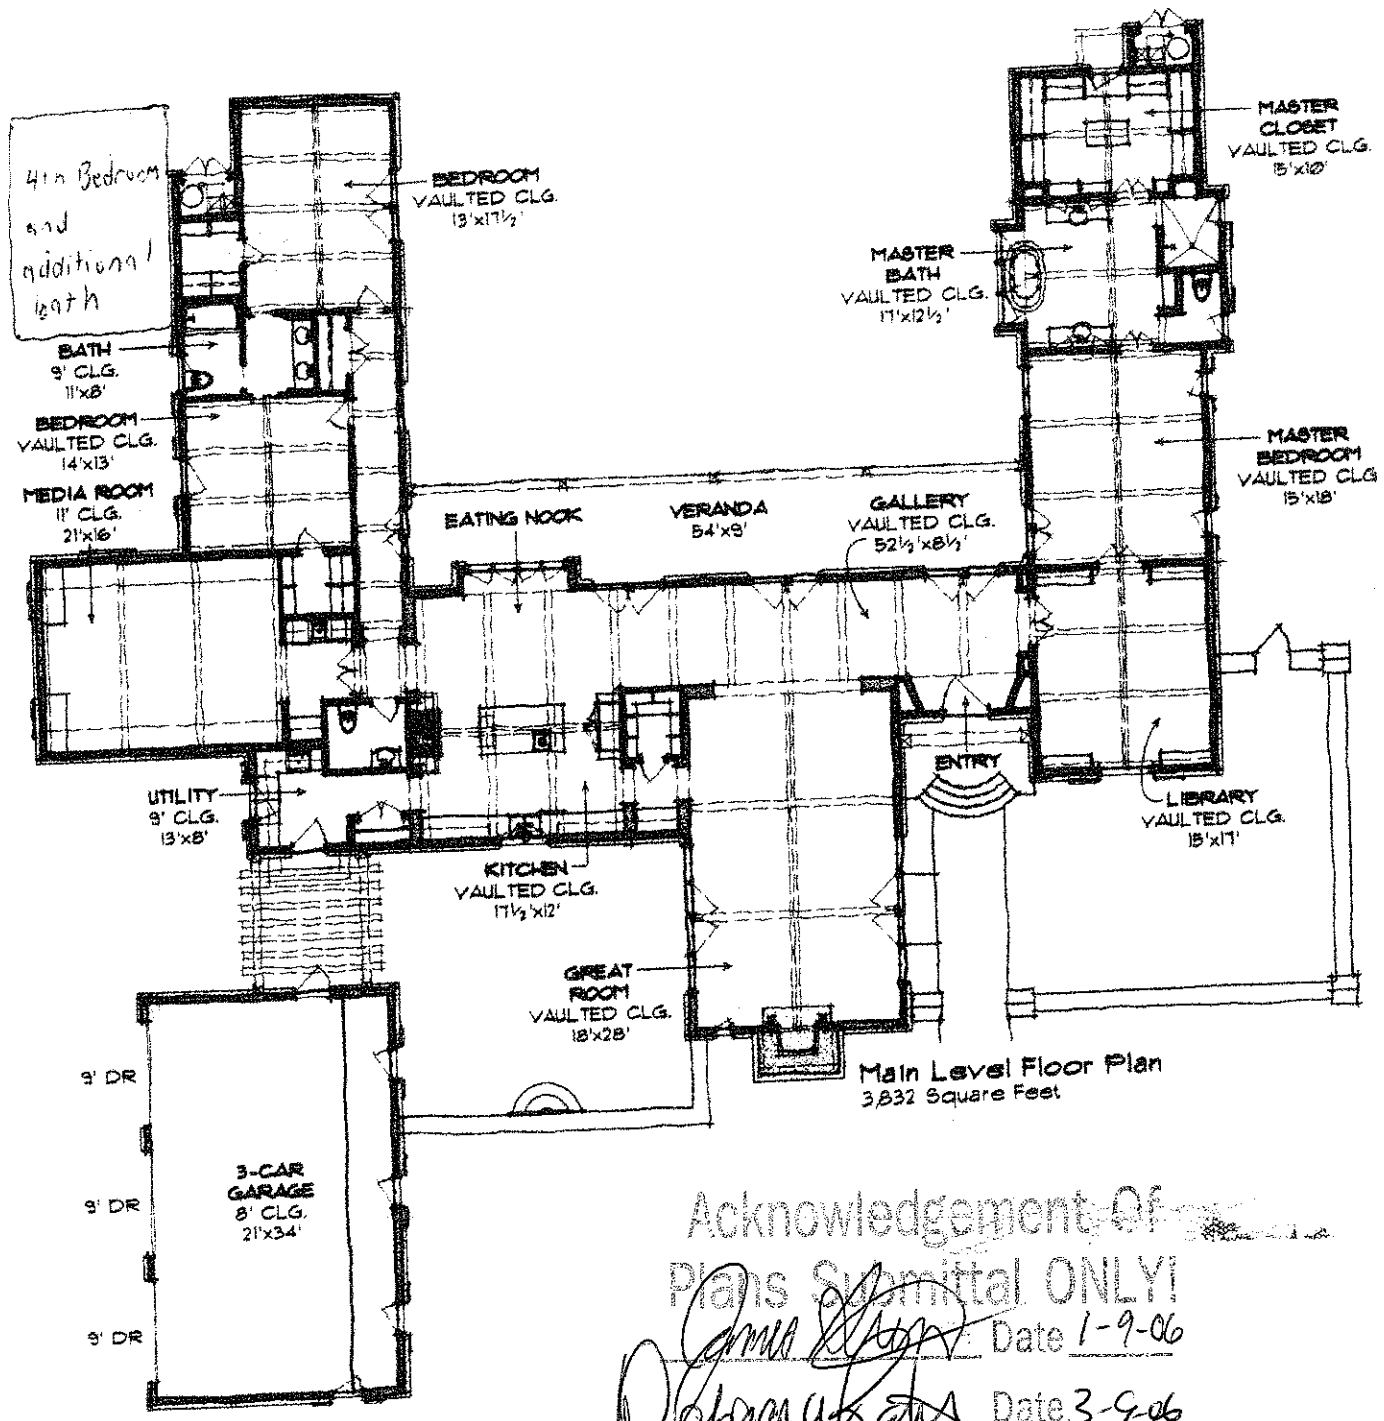

This gorgeous home, the largest and most luxurious version of the Dream Home, incorporates all the features of the original design – the Library in the Master Wing, the magnificent Great Room, the versatile Gallery, the gourmet Kitchen and the spacious secondary Bedrooms. Then it adds the most requested feature for today's family, a Media Room.

The Media Room provides more than enough room for comfortable seating to make movie viewing a real treat. Install your movie screen on the far wall and fill the built-ins with your family's movie library. To complete the viewing experience, stock the Kitchenette with your favorite treats and perhaps even a soda fountain for drinks.

In true Jack Arnold style, this Media Room is really a multi-functional room that can be customized to meet any family's needs. This space can be many things – an Exercise Room, a fourth Bedroom with the Kitchenette converted to a fully-appointed Bath, a generous Mother-In-Law Suite, a Home Office, a Studio, a Music Room, even a Recording Studio. Truly the possibilities of this, the largest version of the Dream Home, are limited only by your imagination.
