This inviting one-story home is full of fancy touches not usually associated with such an economical floor plan! A quaint, covered porch adorns the entry, which leads first to two secondary bedrooms and the well-placed laundry facilities between them. The laundry room has convenient access to the two-car garage, where you'll find plenty of room to assemble that soapbox derby car. At the back of the home, the family room faces a warm fireplace, offering peaceful surroundings for loved ones to share the day's events. With a versatile center island, the adjoining kitchen and breakfast nook promise easy food preparation and convenience for meals on the go! From the nook, sliding glass doors lead to a backyard patio, a perfect escape during large parties. In the summer, the patio and backyard may host a happy family barbecue, complete with lawn darts, badminton and your favorite aunt's famous potato salad! Occupying a secluded corner, the master bedroom boasts a roomy walk-in closet and a private bath with a handy linen cupboard. This home is available with a crawlspace foundation and features 2x6 exterior wall framing.
