This beautiful country-style home offers a uniquely different floor plan. The deep front porch gives a comfortable welcoming appearance to the house.

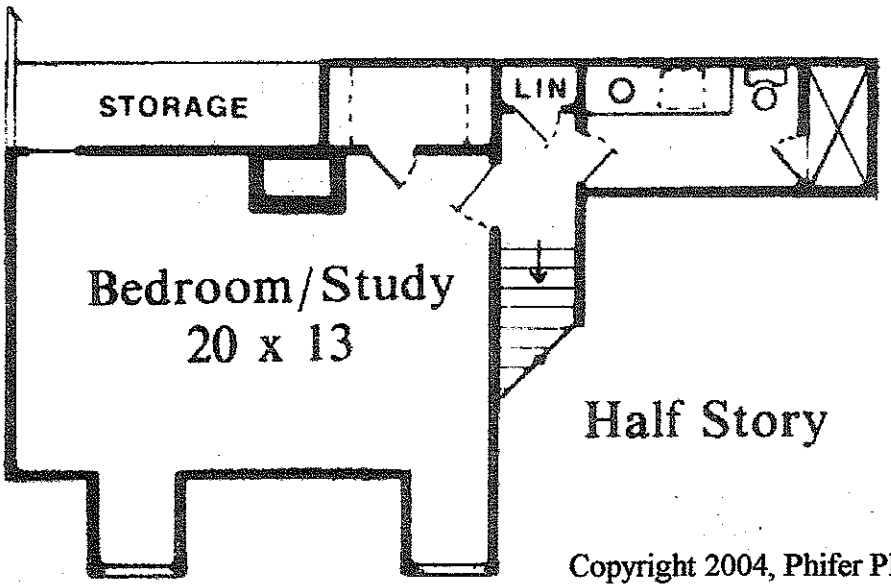

Separated by the centralized living area are two master bedrooms with private baths, walk-in closets and beautiful bay windows.

At the rear of the living room is a fireplace. Stairs on the right lead to yet another private bedroom and bath that can also serve as a guest room or study. This half-story room and bath can be roughed in during construction and finished when needed.

The big family kitchen and dining area is made to seem even larger by the sliding glass doors opening onto the rear deck. Plenty of workspace, a laundry, a walk-in pantry, a built-in desk, plus room for comfortable dining, make this room as functional as it is attractive.

First Floor	1,483 Sq. Ft.
Second Floor	460 Sq. Ft.
Total Heated	1,943 Sq. Ft.
Porch	144 Sq. Ft.
