Country Point of View *(Refer to price level D)*

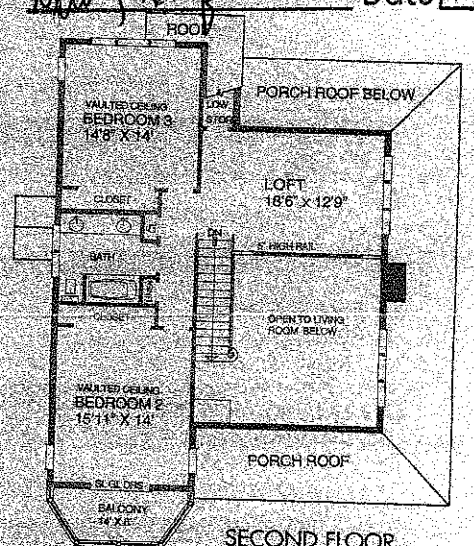

Plan No. AP7151

This eye-catching country contemporary offers spectacular views from every room—and a whole lot more. Its covered porch wraps three sides, providing summer shade and a natural breezeway. Inside, living and dining rooms benefit from a fireplace flanked by large and high expanses of glass. The living room reaches two floors and all first floor rooms are at least 9' high, accentuating the airy effect. The master bedroom holds the front bay, turning it into a charming sitting area, while the smaller back bay forms an equally cozy breakfast nook. Upstairs, the front family bedroom, whose vaulted ceiling rises to 11', opens out to a private balcony. The back bedroom also features a similar vaulted ceiling. Skylights at the back and another arched window at the side brighten the versatile loft space which overlooks the living room.
